SUMMARY

Enthusiastic B.Tech Electronics and Communication Engineering graduate with a strong interest in web development. Currently developing expertise in MEARN Stack including React, MongoDB, Node.js, Express through hands-on projects and continuous learning. Looking for an opportunity to apply my technical skills in a dynamic work environment and contribute to real-world projects while continuously enhancing technical expertise.

PROJECTS

Speed Cart

2026

- This is an e-commerce application using React, Redux Toolkit, Tailwind CSS and REST APIs.
- Focuses on core features like product listing, cart management, wishlist, product search, checkout flow and 'Your Order' section where users can track order status.
- <https://speed-cart-redux-2026.netlify.app/>
